**TARIFF FORMAT**

- A. Page Numbering** - Page numbers appear in the upper right corner of the page. Pages are numbered sequentially. However, new pages are occasionally added to the Tariff. When a new page is added between pages already in effect, a decimal is added. For example, a new page added between pages 14 and 15 would be 14.1.
- B. Page Revision Numbers** - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current page version on file with the Commission. For example, the 4th revised Page 14 cancels the 3rd revised Page 14. Because of various suspension periods, deferrals, etc. the Department follows in their tariff approval process, the most current page number on file with the Department is not always the Tariff page in effect.
- C. Paragraph Numbering Sequence** - There are various levels of alphanumeric coding. Each level of coding is subservient to its next higher level. The following is an example of the numbering sequence suggested for use in tariffs.
- 2.1.
  - 2.1.1.
  - 2.1.1.A.
  - 2.1.1.A.1
  - 2.1.1.A.1.(a)
  - 2.1.1.A.1.(a).1
  - 2.1.1.A.1.(a).1.(i)
  - 2.1.1.A.1.(a).1.(i)(1)
- D. Check Sheet** - When a tariff filing is made with the Commission, an undated check sheet accompanies the tariff filing. The check sheet lists the sheets contained in the tariff, with a cross reference to the current revision number. When new pages are added, the check sheet is updated to reflect the revision. All revisions made in a given filing are designated by an asterisk (\*). There will be no other symbols used on the check sheet if these are the only changes made to it (i.e., the format, etc. remains the same, just revised revision levels on some pages). The tariff user should refer to the latest check sheet to find out if a particular page is the most current on file with the Commission.

**SECTION 4 - SERVICE CHARGES AND SURCHARGES, CONT'D.****4.4 Carrier Presubscription**

## 4.4.1 General

Carrier Presubscription is a procedure whereby a Customer designates to the Company the carrier that the Customer wishes to be the carrier of choice for intraLATA and interLATA toll calls. Such calls are automatically directed to the designated carrier, without the need to use carrier access codes or additional dialing to direct the call to the designated carrier.

Presubscription does not prevent a Customer who has presubscribed to an IntraLATA or InterLATA toll carrier from using carrier access codes or additional dialing to direct calls to an alternative long distance carrier on a per call basis.

## 4.4.2 Presubscription Options - Customers may select the same carrier or separate carriers for intraLATA and interLATA long distance. The following options for long distance presubscription are available:

Option A: Customer selects the Company as the presubscribed carrier for IntraLATA and InterLATA toll calls subject to presubscription.

Option B: Customer may select the Company as the presubscribed carrier for IntraLATA calls subject to presubscription and some other carrier as the presubscribed carrier for interLATA toll calls subject to presubscription.

Option C: Customer may select a carrier other than the Company for intraLATA toll calls subject to presubscription and the Company for interLATA toll calls subject to presubscription.

## 4.4.2 Presubscription Options, Cont'd.

Option D: Customer may select the carrier other than the Company for both intraLATA and interLATA toll calls subject to presubscription

Option E: Customer may select two different carriers, neither being the Company for intraLATA and interLATA toll calls. One carrier to be the Customers' primary intraLATA interexchange carrier. The other carrier to be the Customer's primary interLATA interexchange carrier.

Option F: Customer may select a carrier other than the Company for no presubscribed carrier for intraLATA toll calls subject to presubscription which will require the Customer to dial a carrier access code to route all intraLATA toll calls to the carrier of choice for each call.

## 4.4.3 Rules and Regulations

Customers of record will retain their primary interexchange carrier(s) until they request that their dialing arrangements be changed.

Customers of record or new Customers may select either Options A, B, C, D, E or F for intraLATA Presubscription.

Customers may change their selected Option and/or presubscribed toll carrier at any time subject to charges specified in 4.4.5 below:

**SECTION 4 - SERVICE CHARGES AND SURCHARGES, CONT'D.****4.4 Carrier Presubscription, Cont'd.**

## 4.4.4 Presubscription Procedures

A new Customer will be asked to select intraLATA and interLATA toll carriers at the time the Customer places an order to establish local exchange service with the Company. The Company will process the Customer's order for service. All new Customers' initial requests for intraLATA toll service presubscription shall be provided free of charge.

If a new Customer is unable to make selection at the time the new Customer places an order to establish local exchange service, the Company will read a random listing of all available intraLATA and interLATA carriers to aid the Customer in selection. If selection is still not possible, the Company will inform the Customer that he/she will be given 90 calendar days in which to inform the Company of his/her choice for primary toll carrier(s) free of charge. Until the Customer informs the Company of his/her choice of primary toll carrier, the Customer will not have access to long distance services on a presubscribed basis, but rather will be required to dial a carrier access code to route all toll calls to the carrier(s) of choice. Customers who inform the Company of a choice for toll carrier presubscription within the 90 day period will not be assessed a service charge for the initial Customer request.

Customers of record may initiate a intraLATA or interLATA presubscription change at any time, subject to the charges specified in 4.4.5 below. If a Customer of record inquires of the Company of the carriers available for toll presubscription, the Company will read a random listing of all available intraLATA carriers to aid the Customer in selection.

**SECTION 4 - SERVICE CHARGES AND SURCHARGES, CONT'D.****4.5 Public Telephone Surcharge**

In order to recover Company expenses to comply with the FCC's pay telephone compensation plan effective on October 7, 1997 (FCC 97-371), an undiscountable per call charge is applicable to all intrastate calls that originate from any pay telephone used to access Company provided services. This surcharge, which is in addition to standard tariffed usage charges and any applicable service charges and surcharges associated with service, applies for the use of the instrument used to access Company provided service and is unrelated to the service accessed from the pay telephone.

Pay telephones include coin-operated and coinless phones owned by local telephone companies, independent companies and interexchange carriers. The Public Pay Telephone Surcharge applies to the initial completed call and any reoriginated call (e.g., using the “#” symbol). The Public Pay Telephone Surcharge does not apply to calls placed from pay telephones at which the Customer pays for service by inserting coins during the progress of the call.

Whenever possible, the Public Pay Telephone Surcharge will appear on the same invoice containing the usage charges for the surcharged call. In cases where proper pay telephone coding digits are not transmitted to the Company prior to completion of a call, the Public Pay Telephone Surcharge may be billed on a subsequent invoice after the Company has obtained information from a carrier that the originating station is an eligible pay telephone.

**SECTION 5 – LOCAL EXCHANGE SERVICE, CONT'D.****5.3 Basic Local Exchange Service, Cont'd.****5.3.3 Message Rate Local Exchange Service**

Business customers contracting for message rate service are billed monthly at rates specified in the Local Exchange Tariff plus charges for local messages in excess of the message allowance, if any, used during the preceding month.

The monthly period for the message allowance begins on the first billing date following the date of connection. For the fraction of the month preceding the message period, a proportionate part of the monthly contract rate is billed and a proportionate allowance of local messages is made; excess messages, if any, are charged for in each excess message rate step in like proportion.

When a customer changes to or from message rate service, a proportionate part of the monthly contract rate and a corresponding allowance of local messages are made for the fraction of the billing period during which message rate service is used; excess messages, if any, are charged for each excess message rate step in like proportion.

If the allowance is not used in any one month, no credit of messages not used is applied against messages used in any other month.

The furnishing of flat and message rate services on the same premises is not permitted. Message rate service is available only to business customers.

Call Forward Busy – Automatically routes incoming calls to a predetermined telephone number when the called line is busy.

Call Waiting – Signals the Customer with a burst of tone to indicate that another call is waiting. The second call can either be answered by flashing the switchhook or hanging up the phone and being rung back by the caller.

3-Way Calling – Allows the Customer to add a third party to an existing conversation.

Speed Calling 8– Allows the Customer to dial an abbreviated code to originate a call to any of 8 programmed telephone numbers.

Speed Calling 30– Allows the Customer to dial an abbreviated code to originate a call to any of 30 programmed telephone numbers.

**SECTION 6 – SUPPLEMENTAL SERVICES, CONT'D.****6.1 Custom Calling Features, Cont'd.**

## 6.1.2 Description of Features, Cont'd.

Auto Call Back – Automatically redials the last incoming call.

Repeat Dialing – Automatically redials a busy number for up to 30 minutes until line is available.

Priority Call – Provides the customer with a distinctive ring or Call Waiting tone (if the customer has subscribed to Call Waiting), when the customer is called from preselected telephone numbers (quantity varies by technology). The customer can construct or modify a telephone number screening list. The Telephone Company equipment will screen incoming calls against the customer's list and provide the distinctive ring for telephone numbers on the list.

Caller ID – Provides for the display of the calling party telephone number on Caller ID compatible Customer premises equipment.

Caller ID with Name – Provides for the display of the calling party name and telephone number on Caller ID compatible Customer premises equipment.

Call Blocker - Enables the customer to block calls from preselected telephone numbers (quantity varies by technology) and/or the last incoming call (without knowing the number). To block specified telephone numbers, the customer builds a screening list. To block an unknown number after receiving a call, the customer enters a code to add the number to their screening list. If facilities are unavailable to provide incoming call screening via the customer's list, standard call completion will occur. Customers whose telephone numbers are blocked are directed to a Company recorded announcement.

Remote Access to Call Forwarding (RACF) - Provides the customer that also subscribes to Call Forwarding with the ability to activate, deactivate or change Call Forwarding from a remote location. Remote Access to Call Forwarding can only be accessed from a touch-tone telephone. All charges incurred to access the remote number will be billed appropriately.

**SECTION 6 – SUPPLEMENTAL SERVICES, CONT'D.****6.1 Custom Calling Features, Cont'd.**

## 6.1.2 Description of Features, Cont'd.

Selective Call Forwarding - Provides the customer with the ability to forward incoming calls from preselected telephone numbers (quantity varies by technology) to another telephone number. The customer can construct or modify a telephone number screening list. The Telephone Company equipment will screen incoming calls against the customer's list and forward only those from telephone numbers on the list. Customers subscribing to Call Forwarding and Selective Call Forwarding may have only one feature activated at a time (depending on serving technology). The Selective Call Forwarding customer is responsible for the payment of charges (e.g., toll charges) for each call between the Selective Call Forwarding equipped telephone line and the line to which the call is being forwarded. Calls from numbers not on the list will receive standard call completion.

Caller Originating Trace – Allows the Customer to dial a Call Trace activation code to initiate a trace of the last incoming call without obtaining prior legal authorization or assistance from the Company. The results of a completed trace will be recorded in the Central Office and will be made available only to law enforcement agencies, as directed by the Customers.

Distinctive Ring - Distinctive Ring permits a residence customer to designate a distinctive ring on up to 5 telephone numbers from which calls have been forwarded. The customer will designate the distinctive ring telephone numbers on the initial service order. The customer may designate distinctive ring for calls forwarded from a cellular service. Forwarded calls will activate the distinctive ring pattern, while retaining any characteristics present with the original incoming call, such as Caller Name and Number. Distinctive Ring is not available with Personalized Ring 2nd dependent number. Distinctive Ring is not compatible with Call Forwarding features. Distinctive Ring may not work with CPE containing pre-set ring tones.
